# 320 kVA - 1010 kVA

#### **Features**

**Lowest OPEX:** Best in class fuel efficiency with O2E technology

**Lowest Footprint:** Smallest footprint in this range while meeting the performance

& CPCB II Norms

**Modular Control System:** Easily adapted to any configuration, viz standalone, interlocked,

synchronised or grid connected

**KOEL Green Alternator:** Built on globally renowned design. Patented winding design

helps withstand operating harsh conditions.

**KRM:** Critical genset parameters can be viewed on laptop or mobile

Customer Service: Quick and affordable door step service coverage (420+ service

touch points and 6000+ KOEL trained service professionals on

field)

**Warranty:** 2 years warranty\* & labour free onsite service under warranty

period

# **Description**

#### India's #1 Genset brand

KOEL GREEN is the market leader and India's #1 Genset Brand. KOEL's customised power solutions suit a wide range of applications, meeting prime power requirements. KOEL GREEN Gensets are available in sound resistant and environment friendly canopies. KOEL GREEN high horse power (HHP) range is spearheaded by SL90 and DV series. Upgraded with carefully selected technologies to meet latest CPCB emission norms, both SL90 and DV series Gensets are the most efficient machines delivering clean power to large requirements. Having best-inclass fuel economy, the performance capabilities are further enhanced with best-in- class block

loading. KOEL Green HHP Gensets are extensively used in a variety of applications ranging from standard stand-alone Gensets to auto synchronized Gensets, special applications like Stone Crusher to Heat Exchanger cooled solutions for basement installations. KOEL Green is celebrating 30,000 HHP Genset sales, a testimony of superlative product performance in most demanding applications and customer's trust in the range.

# **Best-in-class Fuel Efficiency**

KOEL Green Gensets offer a unique combination of CPCB norm compliance and enhanced fuel efficiency. Across the range, KOEL Green Gensets offer substantial savings in fuel cost.

#### **O2E Series (Optimal Operating Efficiency):**

Genset ranges are selected based on the present load and future expansion. Fuel efficiency of most Gensets is optimized at the full rating of the Genset.

In practice, Gensets rarely get loaded to full capacity. Power demand variations across day & night, weekdays & weekends.

Summer & winter lead to an average 50-70% loading on Gensets. Considering this practical situation, KOEL has extended fuel efficiency optimization from 100%, right up to 50% of rated load. Combination of best-in-class fuel efficiency & O2E provides a double advantage.

# Genset Controls at your finger-tips

There is no comfort like being in command. KOEL Green Gensets put the command in your hands. Micro-processor based Genset controllers display a host of Genset parameters and put all controls at your fingertips.

#### **Monitoring Features**

- Phase Voltages & Currents, Frequency, Reverse power, Genset kVA, kW, kWh, kVAr, Power Factor, Canopy Temperature
- Lube oil Pressure, Engine Temperature, RPM, Run Hours, Number of starts, Fuel Level, Auto / Manual Stop
- Battery charge condition

AMF feature

### **Optional Features**

Modbus communication, Synchronization, Remote Monitoring

#### **Diagnostic Features**

- Battery charging failure, Over/Under speed, Over Current, Over/Under Voltage, Over kW, Phase Seq., Phase missing, Mains Under voltage, Earth Fault trip, Fuel usage Alarm
- Low lube oil Pressure, High Engine Temperature, Low/High battery voltage, Low Fuel Level, Over Crank protection, Routine maintenance indicator, Genset Test Facility, Mains Frequency

# **Peace-of-mind Ownership**

KOEL Green Gensets have always been preferred for their robust design and reliability over long usage life.

KOEL Green range carries the confidence of well-established and proven engine platforms. For compliance to revised CPCB norms, KOEL has carefully selected those technologies which not only retain, but enhance Gensets durability and on-site serviceability.

Thus, KOEL Gensets offer you many years of trouble-free performance; backed by the assurance of prompt support. Peace-of-mind driven by product reliability and low cost of ownership.

# **Assured Delivery**

KOEL Gensets come with a promise of assured delivery against confirmed order placement. Genset being a high value capital purchase may lead to needless block of capital and hence need not be purchased in advance. It is prudent to order the genset at the right time and plan the deliveries in line with your readiness to use. This will also avoid damages to genset due to lying unattended at site and engine re-validation cost.

# **Kirloskar Remote Monitoring system (KRM)**

Your Genset now comes with complete remote monitoring control. Being in control of your own Genset is certainly a winning edge!

The KRM system links your Genset with a central monitoring data server through a SIM and internet. The complete monitoring panel with all critical indicators can be viewed on your laptop screen or mobile. You also get all alarms on your mobile phone.

#### **Critical Parameters:**

Genset Run hrs, Fuel level, Engine oil pressure, Engine temperature, Engine speed (RPM), voltage/current/kW, battery monitoring, PF & Frequency, routine maintenance indicator Critical Alarms: Low fuel level, low lub oil pressure, fuel theft, Engine speed, High Engine temperature, Mains On/Off, Low/ High battery voltage.

#### Advantages of KRM system:

Your Genset will be used most efficiently as it's health meter will always be available at your fingertips. Being a 'remote control' this health monitoring can be done from wherever you are from the actual location of the Genset. This close monitoring also helps in reducing your operating costs and enhancing reliability of the Genset you own. So in all, you have better return on your investment and enhanced productivity by maximum uptime.

# EFFICIENCY HAS A NEW NAME KOEL GREEN

- INDIA'S #1 GENSET BRAND

#### Notes

- \*With 0.845 Specific Gravity of diesel ( 5 % Tolerance ), For well run engines only
- ^ These weight are for handling & transportation only

\*\* Efficiency of Alternator as per standards IEC 60034-1

For Site Conditions other than standard operating conditions consult KOEL for available prime power.

# Prime rating and Stand-by rating 1

'Prime power' is designed for Unlimited hours, as compared to 'Emergency stand-by' designed for 200 hours in a year. Prime rated Gensets also permit 10% temporary overloading. Users need to carefully select the Genset rating to meet their requirement. KOEL offers Prime power as a standard offer. Contact KOEL for stand-by ratings.

#### Engine capacity does matter<sup>2</sup>

Engine capacity (cc) plays a vital role in Genset performance. Higher engine capacity leads to a robust and stable Genset performance.

Higher engine capacity also enables the Genset to respond quickly & positively to sudden load additions.

- · Ease of Access and Serviceability
- · Aesthetically designed, weather and sound resistant enclosure
- Insulation conforms to UL94-HF1 class for flammability

#### Controller

- · Microprocessor based
- Graphical LCD display
- · Best in class monitoring and diagnostic capability
- · Integrable with AMF, synchronization & communication configurations

- · O2E Series: Low emission, high efficiency engines
- Compact, Robust and Rugged Design
- 500 hours lube-oil change period
- Integral set mounted radiator system, designed & tested for 50°C ambient temperature

#### **Alternator**

- Best In Class Efficiency
- Special Windings to Reduce Harmonics
- · Vacuum Pressure Impregnation and epoxy gel coating on the winding

#### **KOEL's approach to meet revised CPCB norms**

Revised CPCB norms are aimed at protecting the environment by reducing Genset emissions and improving emission quality. These are some of the most stringent emission norms in the world.

To meet the new norms, KOEL R&D team had choice of multiple technologies. While selecting the technology, KOEL laid significant emphasis on long term needs of users viz:

- High reliability and durability of Gensets: Owing to extreme operating conditions in India, preference has been given to robust configurations, that have been running successfully for several years.
- Low running costs: An effort to reduce emissions tends to increase the running costs. KOEL succeeded in achieving both in the same design.

- Optimized fuel efficiency as per actual usage: KOEL Green Gen sets are tuned to provide maximum fuel efficiency in the most common operating band. At KOEL, we call it *O2E series* (Optimal Operating Efficiency).
- Affordable, On-site support: Proven technology ensures that product support is available close-by, without waiting for a specialist. KOEL team has taken special efforts to keep complex technologies at bay, which may require high on-site maintenance costs.

All this, while keeping the initial costs within the reach of a smart Genset buyer.

#### Integrated

#### **Best-in-class Fuel Efficiency**

KOEL Green Gensets offer a unique combination of CPCB norm compliance and enhanced fuel efficiency. Across the range, KOEL Green Gensets offer substantial savings in fuel cost.

#### **O2E Series (Optimal Operating Efficiency):**

Genset ratings are selected based on the present load and future expansion. Fuel efficiency of most Gensets is optimized at the full rating of the Genset.

In practice, Gensets rarely get loaded to full capacity. Power demand variations across day & night, weekdays & weekends.

Summer & winter lead to an average 50-70% loading on Gensets.

Considering this practical situation, KOEL has extended fuel efficiency optimization from 100%, right up to 50% of rated load.

Combination of best-in-class fuel efficiency & O2E provides a double advantage.

#### Integrated

#### **Genset Controls at your finger-tips**

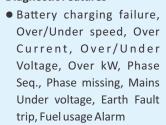

There is no comfort like being in command. KOEL Green Gensets put the command in your hands. Micro-processor based Genset controllers display a host of Genset

parameters and put all controls at your fingertips.

#### Monitoring Features -

- Phase Voltages & Currents, Frequency, Reverse power, Genset kVA, kW, kWh, kVAr, Power Factor, Canopy Temperature
- Lube oil Pressure, Engine Temperature, RPM, Run Hours, Number of starts, Fuel Level, Auto / Manual Stop
- Battery charge condition
- AMF feature
- Modbus communication, Synchronization, Remote Monitoring

#### Diagnostic Features –

 Low lube oil Pressure, High Engine Temperature, Low/High battery voltage, Low Fuel Level, Over Crank protection, Routine maintenance indicator, Genset Test Facility, Mains Frequency

#### **KG745 Controller**

**KRM Desktop Display** 

#### Integrated

#### **Peace-of-mind Ownership**

KOEL Green Gensets have always been preferred for their robust design and reliability over long usage life.

KOEL Green range carries the confidence of well-established and proven engine platforms. For compliance to revised CPCB

norms, KOEL has carefully selected those technologies which not only retain, but enhance Gensets durability and on-site serviceability.

Thus, KOEL Gensets offer you many years of trouble-free performance; backed by the assurance of prompt support. Peace-of-mind driven by product reliability and low cost of ownership.

## The Promise Behind The Product

#### **KOEL Green Brand**

KOEL Green is the Genset brand of Kirloskar Oil Engines Ltd (KOEL), the flagship company of the centuryold Kirloskar Group. KOEL Green is India's largest selling and most trusted Genset brand for over a decade. Providing back-up power solutions from 2.1 to 5200 kVA for diverse market sectors, "KOEL Green" has over 1 million Gensets in service across the globe.

#### Research and Engineering

KOEL Gensets are designed and developed indigenously, using modern design & simulation technologies. KOEL's R&D team combines decades of application knowledge, global technology trends and emerging user expectations to develop best-in-class products for the target markets. The products are launched after extensive validation in world-class facilities.

#### State-of-the-art Manufacturing

KOEL Green Gensets are manufactured at the state-of-the-art manufacturing facilities of KOEL and authorized GOEMs across India. Common design, modern infrastructure, trained manpower, stringent process controls and standardized material quality ensure that every KOEL Green Genset complies with the standards and meets KOEL's stringent quality norms.

#### Sales Network

A well-trained network of authorized KG Dealers and GOEM Sales teams is spread across India to serve your requirements. KOEL offices at key locations provide further techno-commercial back-up. KOEL Sales teams are equipped to carry-out load study, Genset sizing and techno-commercial support. Installation and commissioning activities are also undertaken in line with KOEL's stringent guidelines.

#### **Service Network**

As Genset cannot be driven to a Service Station, service has to come to your door-step. KOEL Green Gensets are supported by over 5000 trained Engineers and over 450 well-equipped service outlets throughout India. Standard and custom-made maintenance packages offer a total-peace-of-mind ownership experience. Service response time and quality is centrally monitored for cross-industry bench marking and continual improvement. Customers just need to dial our toll free number and service will be available at the door step.

#### 7 Easy steps for a happy Genset Ownership

- Insist on a load-study
- Select the Genset rating as per the load-study and with sufficient margin for future load expansion
- Apply site-selection guidelines carefully
- Insist on installation in line with KOEL Green guidelines
- Ensure adequate size and proper connection of cables
- Understand the Genset operation & maintenance procedures during commissioning
- Follow routine maintenance protocols through authorized KOEL Green service dealers
